

## Instructions:

1. In the bucket, combine ingredient cups 1 and 2, and observe reactions on your observation sheet.
2. Stir the solution for a bit.
3. Add the contents of ingredient cup 3 slowly and stir. Observe the reactions on your observation sheet. What happens when you stop stirring?
4. Continue stirring, then equally distribute the solution into the watercolor tray sections. DO NOT fill the holes all the way up, leave space.
5. Using the eyedroppers, add 2-3 drops of the liquid watercolors (in any combination you like) and stir so that the color is evenly distributed. You may notice that you need to add more color as you stir.
6. Name the colors that you created and indicate them on your observation sheet. Get creative with the names!
7. When finished filling the tray, return the completed tray to Ms. Trina and they will dry overnight. Next class, we will test the finish paints.
